

Department of Support Services

The Support Services Department supports and meets the needs of operational structures for human resources, equipment & supplies, finance, and information technology through the recruitment of personnel, planning and allocation budget, and management and administration of support services in general, in order to provide a better working environment for the Police officers.

Directorate of Personnel

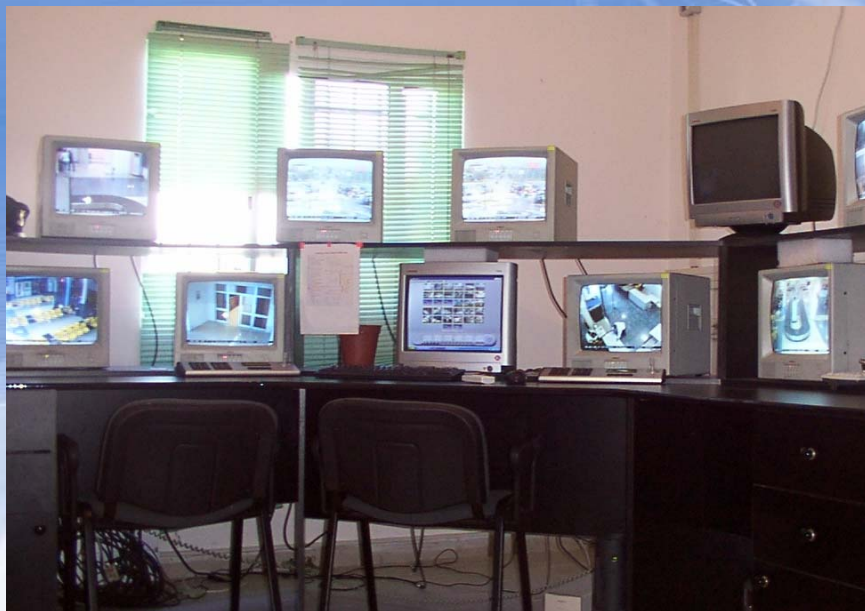

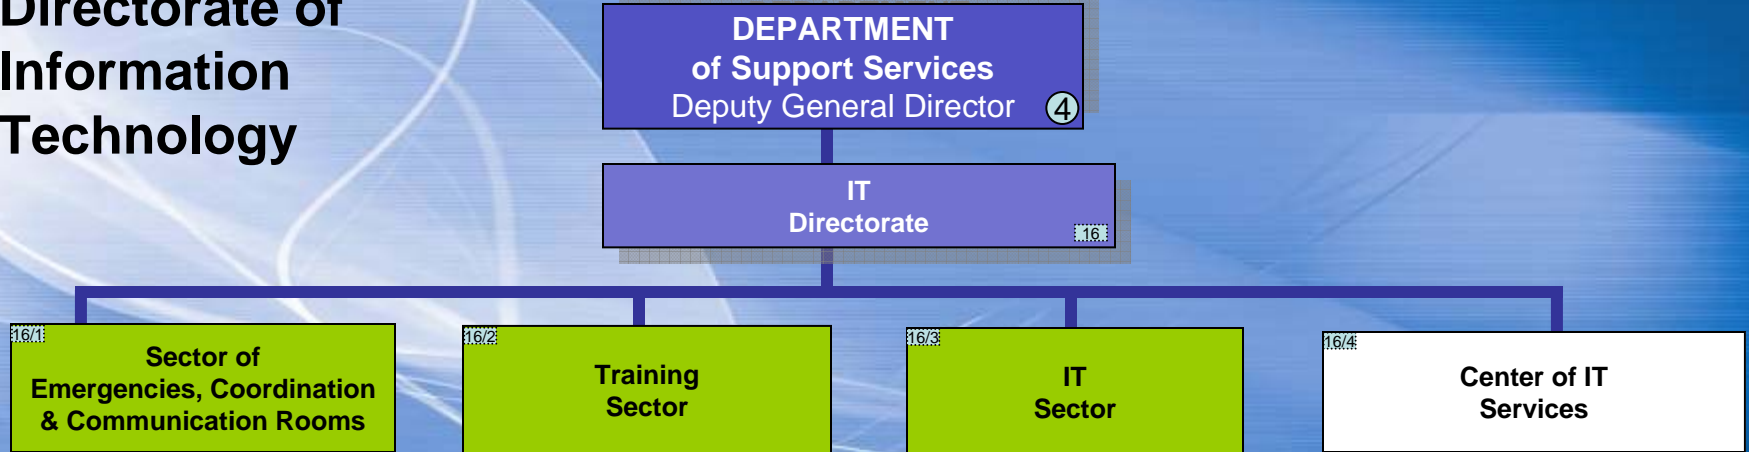

This Directorate is responsible for the recruitment, training, career development, compensation, supervision, and management of State Police personnel in compliance with the Albanian legislation.

The Directorate organizes and coordinates the activity with other Departments of the State Police in order to draft studies and analyses on the needs and organizational composition of the State Police; select Police employees for promotion in rank; and draft fiscal policies for the compensation of Police officers.

Directorate of Information Technology

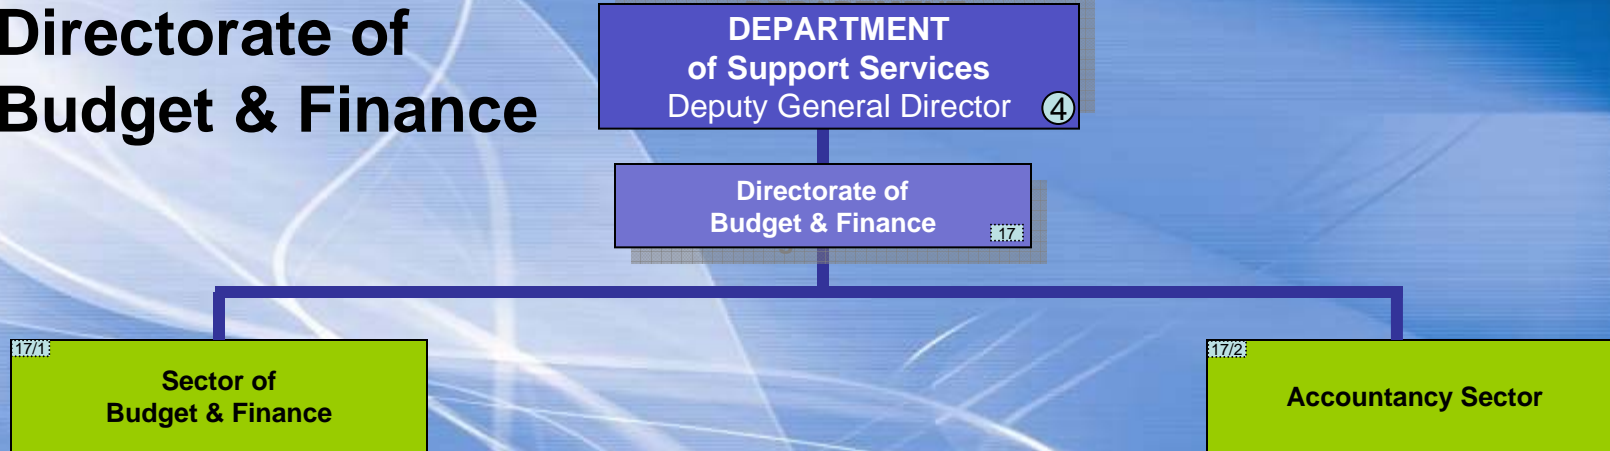

The Directorate's mission is to study, design, and implement new technologies for radio-relay, telephony, and automated equipment currently in use by the State Police, and monitor their maintenance in order to ensure the total management of police information.

The Center of IT Services assists, coordinates, drafts, and recommends IT plans and programs for the standardization of new technologies of the intelligence network, radio-relay, digital and analog telephony, and the proper maintenance of IT systems and equipment.

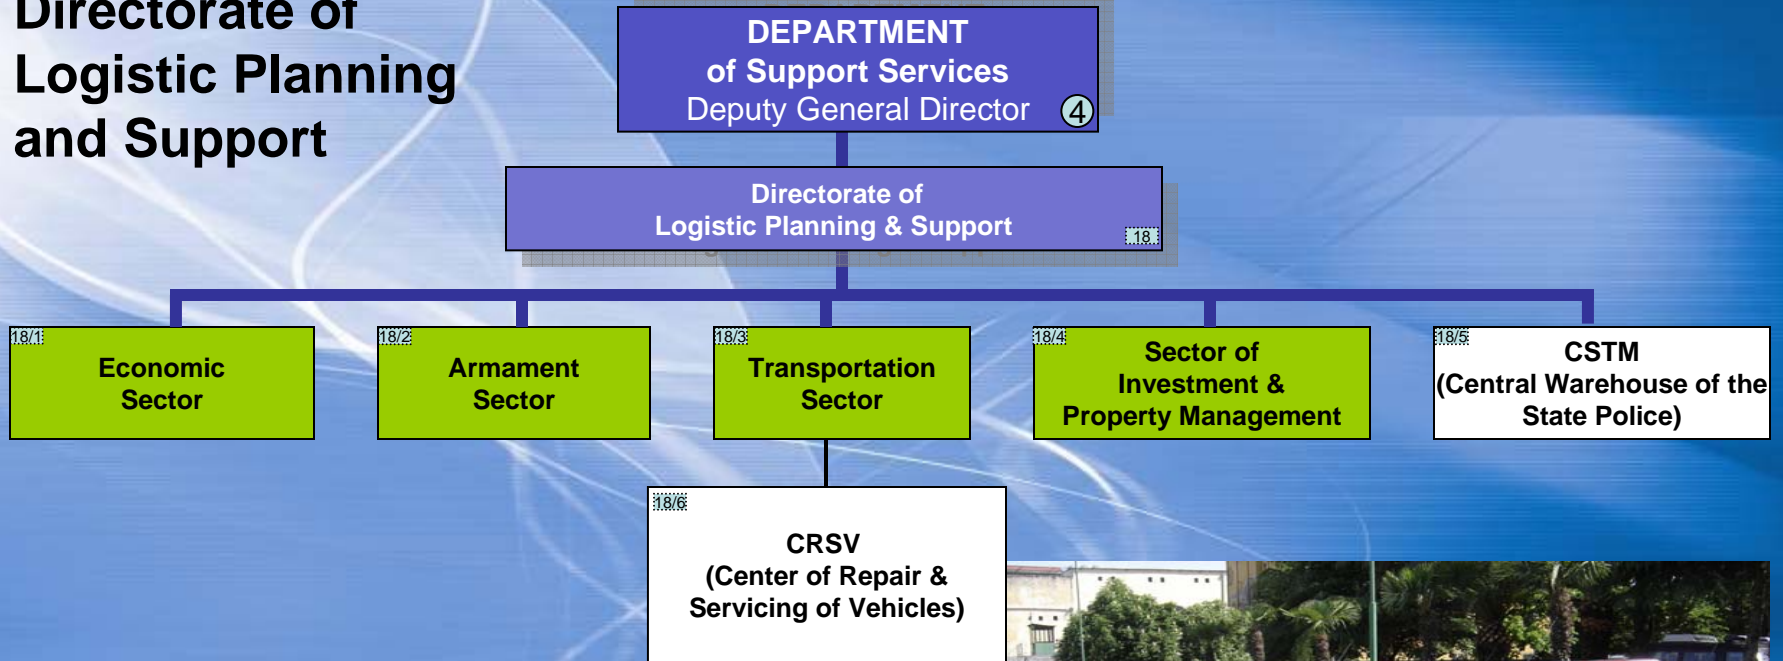

Directorate of Budget & Finance

The mission the Directorate of Budget & Finance is to manage the financial resources and administer the material goods; oversee the implementation of the approved budget for items and sub-items throughout its subordinate structures; and draft the budget and follow its implementation in compliance with the proper legal procedures.

Directorate of Logistic Planning and Support

This Directorate manages the performance of local and central support structures related to the planning and administration of current resources, and creation of alternative resources in compliance with the budget requirements and opportunities, in order to provide the best possible working conditions for the operational structures.
